

PRESS RELEASE

Vogelsang to present solutions for wastewater disposal at Bus2Bus

- **Mobile and stationary disposal solutions for wastewater**
- **Systems for bus companies, gas and truck station operators**

Essen/Oldb., February 12, 2019 – With the RoadPump and its different specifications [Vogelsang GmbH & Co. KG](http://www.vogelsang.com) will present its solutions for hygienic wastewater disposal from busses at **Bus2Bus from 19 to 21 March (hall 26, booth 606)** in Berlin. The system is available in three series: The RoadPump Eco is a mobile wastewater disposal system that provides a cost-effective solution for smaller bus companies. The RoadPump Easy is designed as a stationary system which can also, in addition to wastewater disposal, supply busses with flushing water. The RoadPump Plus is suitable for gas station and truck stop operators. In addition to the flushing system, it also has a drinking water filling system and was awarded with the “busplaner Innovation Prize” 2018 in the workshop category for its innovative concept.

Odorless disposal: Suction nozzle BusPlug

For emptying the wastewater tank, all systems can be connected to the CollectingMax drip pan, which collects the wastewater discharged according to the conventional method. The wastewater is then pumped into the sewer system or into an intermediate tank and transported to the sewage treatment plant. Wastewater disposal is particularly fast, clean and hygienic in combination with the BusPlug, the patented suction nozzle for waste holding tanks in the bus. The BusPlug connects the bus toilet tank and extraction station with a hose. Vogelsang thus creates a continuous disposal system that prevents the contamination of the immediate environment and unpleasant odors.

Robust rotary lobe pump for smooth pumping

All RoadPump systems are equipped with a Vogelsang VX series rotary lobe pump, which is particularly compact and robust. The pump is resistant to foreign matter. Thus, toilet paper and foreign objects in the wastewater have no influence on the operation of the rotary lobe pump.

Vogelsang at Bus2Bus, 19-21 March 2019, Messe Berlin: hall 26, booth 606

For **press representatives**, we are pleased to arrange an appointment for a **personal meeting** at the Vogelsang booth (hall 26, booth 606). Please register by **4 March** at:

VOCATO public relations GmbH, Friederike Wagner / Sina Oesterreicher
Tel.: +49 2234 60198-16 / -11
Mail: fwagner@vocato.com / soesterreicher@vocato.com

About Vogelsang:

Vogelsang GmbH & Co. KG develops, produces and distributes technically high-quality machines that are easy to maintain. Its head office is located in Essen/Oldenburg in Lower Saxony, Germany. Founded in 1929 as a manufacturer of agricultural machinery, the company has grown to become a specialist in individually configurable machines for the wastewater, agricultural, biogas, industrial and traffic sectors. At present, the mid-sized, innovative family business employs over 900 people worldwide. Vogelsang ensures the highest production quality through its research, development and manufacturing operations at its location in Germany. As an internationally oriented machine construction company, Vogelsang also operates manufacturing centers domestically and abroad. A continuously growing network of subsidiaries and representatives allows Vogelsang to be present in more than 25 locations worldwide, in all European countries and important industrialized nations in the world. This year the company celebrates its 90th anniversary. Further information can be found online at: **vogelsang.info**
